## **Bookeye® 4 V2 Kiosk**

### **The unique self service scanner.**

Bookeye® 4 V2 Kiosk was designed specifically for self service applications. A casual user, from any walk of life, can quickly and easily operate this book scanner.

The unique book cradle solution allows users to digitize bound documents at a resolution of 400 dpi and A2+ in size, by either laying them flat on the scanning bed or in the V-cradle, at an angle of 120 degrees.

Scanned images can be output to USB, eMail, network, printer or on a mobile device like an iPad or Android tablet.

### **Bookeye® 4 V2 Kiosk does the accounting for you!**

The Bookeye® 4 V2 Kiosk copier has an integrated billing module. This means that for all applications that do not have an existing card or billing system, Bookeye® 4V2 Kiosk can take over the billing itself. Configurable invoice printing and journaling are standard functions in the Bookeye® 4 V2 Kiosk as well as remote locking and unlocking of the system.

### **The Applet Concept of the Bookeye® 4 V2 Kiosk**

#### **Simple and flexible design of the user interface**

All of our Bookeye® scanners are controlled via a large color WVGA touchscreen. The interface running on the touchscreen can have a customized look and include only the functions the user really needs.

A variety of prepared applications, from the simple START | SCAN | STOP to demanding graphical solutions, are available.

### **Scan2Pad®**

#### **Scanning with your tablet**

Scan2Pad® enables wireless connection of the Bookeye® 4 V2 Kiosk directly to mobile devices like iPads, Android tablets and smartphones. The book scanner can be operated directly from your tablet and the scanned images are available immediately on the mobile device for further processing and storage. With Bookeye® 4 V2 Kiosk and Scan2Pad®, all data transferred are secured via WPA2 encryption.

The Scan2Net® platform is the technological foundation of all WideTEK® and Bookeye® scanners from Image Access. It replaces the proprietary scanner drivers and software that traditional scanners require with the fastest common, nonproprietary inter-device connection available: TCP/IP over Ethernet. With network interface speeds much higher than USB 2.0 or USB 3.0 scanners, Scan2Net® devices are able to reach unrivaled performance at extremely low connectivity cost.

Scan2Net® scanners feature a 64bit Linux based operating system, dedicated to scanner specific imaging and mechanical control tasks, maximizing scanning speeds and performance.

## Scan2Net® Advantages

- 64bit Linux based computer, fast and virus protected
- Easy integration into existing network structures
- Only a single IP address is required to run the scanner
- Integration and remote access via the Intranet or even the Internet
- Scans directly to SMB, FTP, hot folders, USB, Email or the Cloud without external PCs
- Simple, intuitive operation, Java and HTML based
- Clear menu structure, operation via touchscreen, acoustical feedback
- Multilanguage support, customizable user interface
