WideTEK Adjustable Stand

The new WideTEK® stand, WT-STAND-ADJ is a fully adjustable stand that accepts printers of any width and up to 1180mm (46,5") high. The height of the stand can be lowered to 880mm (34,5") if necessary.

It is preassembled for all WideTEK 36" scanners but with the exchange of two brackets, it can also accommodate 44 and 48 inch scanners. Which, when mounted to the stand, can be moved toward the front on telescopic guides. The design is not only extremely stable but also can invisibly hold the power supply, a network switch and a power extension bar in the back of the lower crossbar.

A WideTEK 36CL-MF in the highest position pushed to the back.

Features of the WideTEK Adjustable Stand

- Most versatile MFP stand in the industry.
- Supports any width printer, up to 1180mm (46,5") high.
- Fast copy to HP, Canon, Epson and Océ printers.
- Sits against a wall, leveled via adjustable feet.
- Slightly angled forward for convenient access by operators.
- The lock and release mechanism allows the scanner to be moved forward to the operator for easy access.
- Supports WT36CL, WT48CL, WT36CL-MF, WT36, WT44, WT48.
- Easy storage of power supply and cables behind the crossbar.

A WideTEK 48CL in the lowest position pulled to the front.
